Rapid Fire Protection, Inc.

Always Safe Always Prepared

www.RapidFireInc.com
About Us

Rapid Fire Protection is a contractor specializing in the installation of automatic fire sprinkler and fire alarm systems. We have installed hundreds of systems in health care, commercial, industrial, educational and residential facilities. All of these projects were finished on time and to the owner’s satisfaction. In addition we engineer, install, inspect and service FM-200, high expansion foam, AFFF and CO2 systems.
Industry Leader

We have one of the most experienced staffs in the entire region. We are fair, flexible, competent and easy to work with. We are based out of Rapid City, South Dakota and have satellite offices in North Dakota, Utah, Colorado and Wyoming. We are currently working in several additional states and we are always looking to build new relationships that are mutually beneficial.
Fire is a threat to your real property, equipment, inventory, information technology and company employees. In addition, an unchecked fire can disrupt your business continuity, putting at risk your operational viability even though your business may be fully insured.

Can you survive being out of business for several weeks or months while you rebuild in the aftermath of a fire that could have been contained?

Our experience ranges from small single family dwellings to multi-million dollar projects. Protect your people and business assets with Rapid Fire Protection fire sprinkler systems.
Home Fires: More than 3,000 Lives Lost Every Year The fire problem in the U.S. is overwhelmingly a home fire problem. According to the nonprofit National Fire Protection Association (NFPA), homes account for about 80% of all fire deaths in a typical year and more than 95% of all deaths in structure fires in a typical year. Quite clearly, any improvements in overall fire safety must be improvements in home fire safety and no strategy has as much documented life safety effectiveness as fire sprinklers.

Installing a home fire sprinkler system will save lives and prevent injuries. A home fire sprinkler system is the smart and simple way to make sure your family is protected from the potential tragedy of a fire in your home or dormitory.
Industrial

Rapid Fire Protection offers project specific fire risk assessment, value engineering design and specification services for any size project. Our team includes fire protection professional engineers, fire protection consultants and NICET certified designers ensuring that proposals and projects are well designed and qualified upfront to meet any and all requirements. Innovative personalized design, while upholding the highest level of fire protection engineering, is what separates Rapid Fire Protection from our competition.

Other Services

Our Special Hazards Department designs and installs fire suppression and detection to protect mission critical equipment and data. Rapid Fire Protection performs Special Hazards installations throughout our region.

We offer design, estimating, project management, installation, commissioning and inspection of both water and non-water based, custom engineered fire protection and detection systems. We create systems that are uniquely suited to the exact needs of your business.
Rapid Fire Protection Inc. has installed fire sprinklers in over 60 new and existing healthcare facilities. Our staff is aware of the obstacles that are present when working in a fully functioning healthcare facility. We are confident that you will find our company open to suggestion and sympathetic to your patient and staff’s needs and concerns. We believe that communication and team work are the key components to a successful project.
Rapid Fire Protection provides the periodic inspection of your sprinkler system that is required by the current national codes and local jurisdictions. Our inspectors are also ASSE Backflow Certified.

We provide 24 hour service, 7 days a week, 365 days a year. This aligns with our firm belief in providing the highest level of service after the sale. From a simple wet system to a complex high expansion foam installation, we can service any type of system.

Rapid Fire Protection can also meet all of your retrofit and remodel needs for your existing fire sprinkler system.
Our design team is one of the most qualified in the business. We provide services during all stages of construction. We have two licensed Fire Protection Engineers on staff that work with general contractors, architects, developers and owners. Our staff engineers provide you with a distinct advantage on design builds, C.M.A.R. projects and other alternative delivery methods. The largest design build contractors in the nation have found that our involvement during the design process has saved them considerable amounts of both time and money.

Building information Modeling

Our experienced design and project staff at RFP can support your BIM management efforts. We’ve had success in supporting general contractors in their schedule management and collision detection efforts using BIM. Let us help you realize the cost saving benefits and efficiencies by providing BIM support to your next fire protection project.
AdTech, Inc.

Since 1994, ADTECH has been providing commercial life safety system sales and service to Western South Dakota. We have years of industry experience that we will use to find a system that fits within your budget and meets your commercial building’s needs. We believe our availability and helpful attitude will make your experience with us most enjoyable. All products and services are covered with a warranty.

Our technicians are factory trained and certified to service many commercial life safety systems. We sell and maintain systems from Faraday, Harrington Signal Inc., Gentex, Siemens, TekTone, Viscount, Crest Electronics, Mircom, Bosch and more.
